

"Personal Site: Pros and Cons"

I have no personal site, but I'm going to create it. I think having a personal site we would receive more opportunities to enter into communication environment. We could use our personal sites as a forum where we could express our ideas, thoughts, interests. We could ask some questions to solve our problems or help other people to cope with their difficult situations. Thanks to our personal sites we could acquaint ourselves with colleagues not only from different parts of Russia but even from other countries. Our job requires hard work and a lot of effort and our personal site could help us to share information. They are advantages, but I think there are also drawbacks. For example, teachers haven't got much free time and personal site requires much work. But I think it is worth creating our personal site!
