

We live in a quiet provincial town. It is small and there are not many places of interest but we love it because it is the place of our birth. It is the town where we made friends, first fell in love and went to school. There are 12 schools in our town. Among them there is a gymnasium and a lyceum. We are lucky to study in lyceum 7. It was first a secondary school which was founded in 1974 and in 2008 it became a lyceum. It is a unique place to study! It is the best! Our lyceum is equipped with modern computers. There are Smart boards in all the classrooms. The pupils have a great opportunity to get profound knowledge because in our lyceum there work experienced and highly-qualified teachers. They are the teachers who help to choose a profession properly and way of life. Most of the pupils succeed in life. We are proud of them!
