

Today the Internet becomes not only the most popular mean of communication but also an exchange and information gathering and can be used for different purposes. It is considered that English is the Internet language. Therefore, the Internet is fantastic possibility to learn English. Moreover, by means of the Internet, it is possible to teach English. And one of the most convenient and effective way is the creation of the personal teacher's site. Let's consider its advantages and disadvantages.

On one hand, there are a lot of advantages. Personally, I think the most important of them is the opportunity to use the site by absent children. Secondly, the site motivates children to study foreign language. Thirdly, it assumes non-traditional forms of working with pupils. At last, the personal site is somebody's own ideas and methods of working with different students.

On the other hand, in my opinion, there are two big disadvantages. Firstly, the absence of teachers' desire of self-development. Secondly, if there is a desire there is no possibility to do it. For example, some Moscow schools still have no Internet connection, not to mention about regions.

To sum it up, there will no future without personal sites. Everybody should decide to have or not to have his/her personal site.
